

COMMITMENT TO ACHIEVING NET ZERO

Attends Healthcare AB is committed to achieving Net Zero emissions by 2050.

BASELINE EMISSIONS FOOTPRINT

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2015	
Additional details relating to the baseline emissions calculations:	
<p>The baseline inventory does not cover scope 3 emissions.</p> <p>The data for year 2022 covers the following scope 3 categories: employee commuting, business travel and upstream fuel - and energy-related activities.</p> <p>Calculation of upstream transportation and distribution, waste generated in operations and downstream transportation and distribution have not been made for 2022. The reason for this is that we have historically not collected the data needed for those calculations. During 2024, Attends will complete a corporate carbon footprint covering scope 1, 2 and all applicable scope 3 categories.</p>	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	39,1
Scope 2	1945,3
Scope 3 (Included Sources)	No Data
Total Emissions	1984,4

CURRENT EMISSIONS REPORTING

Reporting Year: 2023	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	71.58
Scope 2	16.26
Scope 3 (Included Sources)	201668.37 (All applicable scope 3 categories according to GHG-protocol)
Total Emissions	201756.21

EMISSIONS REDUCTION TARGETS

In order to continue our progress to achieving Net Zero, we have decided to calculate our corporate carbon footprint and set targets validated by the Science Based Targets initiative.

Our current targets are:

- Annual sourcing of 100% renewable electricity.
- Annual sourcing of 100% renewable district heating.
- Convert backup heating system from fossil-based to renewable by 2027.

Science-based targets validated by SBTi:

- Attends Healthcare AB commits to reduce absolute scope 1 and 2 GHG emissions 42.00% by 2030 from a 2023 base year.
- Attends Healthcare AB commits to reduce absolute scope 3 GHG emissions from purchased goods and services, capital goods, fuel- and energy-related activities, upstream transportation and distribution, waste generated in operations, business travel, employee commuting, upstream leased assets, downstream transportation and distribution, processing of sold products, use of sold products, end-of-life treatment of sold products, downstream leased assets, franchises, investments 25.00% by 2030 from a 2023 base year.
- Attends Healthcare AB commits that 40.00% of its suppliers by emissions covering purchased goods and services, upstream transportation and distribution, will have science-based targets by 2029.
- Attends Healthcare AB commits to reach net-zero greenhouse gas emissions across the value chain by 2050.
- Attends Healthcare AB commits to reduce absolute scope 1, 2 and 3 GHG emissions from purchased goods and services, capital goods, fuel- and energy-related activities, upstream transportation and distribution, waste generated in operations, business travel, employee commuting, upstream leased assets, downstream transportation and distribution, processing of sold products, use of sold products, end-of-life treatment of sold products, downstream leased assets, franchises, investments 90.00% by 2050 from a 2023 base year.

CARBON REDUCTION PROJECTS

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2015 baseline. The carbon emission reduction achieved by these schemes equate to 1742,6 tCO₂e, a >85% reduction against the 2015 baseline and the measures are in effect when performing the contract.

- Change to 100% renewable electricity.
- Recycling of heat from process air.
- Change to LED lighting in production, warehouse and office areas.

The following initiatives are completed, but not included in the emission reduction above:

- Nordic Swan Ecolabel certification for our major product groups.
- Certified environmental product declarations (EPD) for our major product groups.
- Beyond value chain mitigation of remaining scope 1 and 2 emissions since 2021.
- Validated SBTi targets.
- Introduction of 30% PCR in selected bags.
- Calculating total carbon footprint including scope 1,2 and 3.

In the future, we hope to implement further measures, such as:

- Converting emergency power to renewable fuel for 100% renewable energy use on site (current result 99.8% renewable).
- 50% PCR in bags.
- ISCC plus certification for use of recycled and renewable polymers.
- Working with suppliers to decarbonize our supply chain.
- Working with customers to find carbon savings in product design, use and end-of-life.

DECLARATION AND SIGN OFF

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting .

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the selected subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard .

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

SIGNED ON BEHALF OF THE SUPPLIER:

Sarah Curtis

Managing Director - UK, Ireland & Benelux

30th April 2025
